

We are pleased to recommend the services of Transition Technologies S.A., Pawia Str. 55, 01-030 Warsaw, which was a part of a team responsible for ONKO.SYS cancer research platform implementation for The Maria Skłodowska-Curie Institute of Oncology in Warsaw. Within the ONKOS.SYS platform, the company has been involved in delivering a medical data warehouse, has also provided and implemented an IT tool called MedStream Designer (MSD). With MSD it is possible to quickly and easily isolate groups of patients according to, for example, diagnosis, therapy or other information, including those contained in medical notes. The MSD system supports not only scientific activity but also doctors and managers of the Institute. It supports us also monitor medical examinations, analyze patient's diagnoses and drugs used in specific groups of patients, effectiveness of a therapy. The MSD tool is quite simple; its use requires no more than 2h of training. Cooperation with Transition Technologies S.A., was very good. The company showed us a high professionalism, impeccable approach to commitment and openness to the specificity of our expectations.

Transition Technologies S.A., is a worthy partner in the field of medical data integration as well as intuitive IT tools provider, which can support every medical institution.
